Histology: An Essential Textbook is a concise, multimedia study guide for medical students who need to learn the functions and related correlations of cells, tissues, and organs of the human body. Professor D.J. Lowrie, Jr. has written a unique and practical medical histology resource based on self-directed modules originally created to replace live histology laboratory sessions. This resource will help medical students learn how to identify histological structures on slide preparations and electron micrographs. Short videos by the author, who demonstrates structures via digitized histology slides, provide additional guidance. Shorter, targeted concepts and brief explanations accompanied by numerous illustrations, self-assessment quizzes, and videos demonstrating key features of histological structures set this resource apart from existing, text-dense books. Key Features Nearly 850 images, consisting primarily of electron and light micrographs, aid in identification of histological structures and long-term retention. Correlation of histological structure with other basic science disciplines, such as gross anatomy, embryology, and pathology allows students to integrate material effectively. Over 1000 online multiple choice questions and answers mirror exam topics students frequently encounter in curriculum and the USMLE®. Nearly 375 videos provide a personal tutor that teaches students histological structures, while providing tips for proper identification. This is a must-have self-study guide for medical students, as well as a stellar teaching tool for instructors. First published in 1944, Orban's Oral Histology and Embryology has become the classic text for successive generations of dental students. While retaining the same fundamentals and lucid writing style, this book reflects the current advances and latest curriculum offered in Indian universities. In the fourteenth edition, all the chapters have been thoroughly revised and updated discussing biological aspects of oral tissues and emphasizing the clinical relevance of oral histological aspects. Molecular Events in Oral Histology is now available as an online supplement ([resources.clinicallearning.com](http://resources.clinicallearning.com)) Practical supplement with photomicrographs and pencil diagrams of photographed field. All the line illustrations have been modified and poor quality photographs replaced with improved ones for better understanding of the subject. New chapter on Age Changes in Oral Tissues. More/ improved color illustrations. Summary with subheadings for quick review. More text boxes and flowcharts incorporated to highlight important concepts and for ease of understanding subject matter. Textbook of Histology, 5th Edition, brings you up to date with all that's new in the field, while providing a solid foundation in the basic science and clinical application of cellular and molecular biology. Concise and highly illustrated, it functions as both a text and a histology laboratory guide and remains the only histology textbook that includes laboratory exercises for nearly every chapter. Numerous new clinical observations illustrate the importance of histology to clinical practice. More than 170 photomicrographs as well as new drawings, and histology laboratory instructions in most chapters have been added to this edition. Greatly revised content includes new findings in cellular and molecular biology such as the newly discovered endoplasmic reticulum-shaping proteins, the abundance of stem cells in adipose tissue, the phases of Alzheimer's disease and the role of the newly discovered glymphatic system in slowing the progression of the disease, and developments in the microbiome. More quick-reference tables have been added to summarize information discussed in the text. PowerPoint™ presentations, bolded key terms, bulleted lists, and chapter summaries highlight "need to know" information and facilitate comprehension. A combination of USMLE-style questions and image-based questions are found in each chapter of the digital edition. The most authoritative histology text available -- now in full-color.
