The Godhead Trilogy Apr 30 2020 The award-winning, irreverent, and darkly funny trilogy from “the most provocative satiric voice in science fiction” (The Washington Post). The complete Godhead Trilogy from James Morrow, including *Towing Jehovah*, *Blameless in Abaddon*, and *The Eternal Footman*. In the World Fantasy Award–winning *Towing Jehovah*, God is dead, and Anthony Van Horne must tow the corpse to the Arctic (to preserve Him from sharks and decomposition). En route Van Horne must also contend with ecological guilt, a militant girlfriend, sabotage both natural and spiritual, and greedy hucksters of oil, condoms, and doubtful ideas. *Blameless in Abaddon*, a New York Times Notable Book of the Year, is “funny, ferocious fantasy” (Philadelphia Inquirer). God is a comatose, two-mile-long tourist attraction at a Florida theme park—until a conniving judge decides to put Him on trial in The Hague for crimes against humanity. *The Eternal Footman* completes Morrow’s darkly comic trilogy about God’s untimely demise. With God’s skull in orbit, competing with the moon, a plague of “death awareness” spreads across the Western hemisphere. As the United States sinks into apocalypse, two people fight to preserve life and sanity. A few highlights: a bloody battle on a New Jersey golf course between Jews and anti-Semites; a theater troupe’s stirring dramatization of the Gilgamesh epic; and a debate between Martin Luther and Erasmus. Morrow also gives us his most chilling villain ever: Dr. Adrian Lucido, founder of a new pagan church in

Mexico and inventor of a cure worse than any disease.

Researching the Military Nov 05 2020 *Researching the Military* focuses on the experiences of researchers who study the military around the world. It explores the historical, social, institutional and personal factors that frame research and scrutinize the way knowledge in this area impacts society and policy. More than merely analyzing research experiences (yet necessarily including them), it is also about the experiences of researchers, their position with regard to the object of their studies, the institutional context where they work and the way their research impacts the academic and policy-making fields in the respective countries. The common theme to the various chapters is reflexivity, a conscious effort at addressing the conditions of research and the position of the researcher and the research participants in that interface. By collecting diverse experiences of researchers from across the world, this volume aims to enhance reflexivity in the field

of military studies and to encourage the exchange of knowledge between the academic field and the military arena. This book will be of much interest to students of military studies, research methods, sociology, social anthropology and security studies, in general.

The Royal Navy and Falklands War Mar 10 2021 Soldiers and journalists alike wasted no time in telling the story of the campaign to recapture the Falkland Islands after the Argentinian invasion in April, 1982. Almost without exception, however, they are concerned largely on the role of the Army, for it was the part they played which particularly fired the public imagination, and it may be said that the role of the Royal and Merchant Navies, the abiding images of which are for many the pictures of the exploding frigate *Antelope*, and the burning *Atlantic Conveyor*, has hitherto been overshadowed by the yomping of the Marines and the exploits of certain gentlemen of the press. Yet none of them would have been there at all had the Royal Navy not provided the necessary transport, not to mention air cover and bombardment support. In the book David Brown, head of what was formally the Naval Historical Branch at the Ministry of Defence, tells in full for the first time the extraordinary story of how the fleet was assembled; of how merchant-ships from luxury liners such as the *Canberra* to cargo-carriers of every description were 'Taken Up From Trade' and, in a staggeringly short time, converted to their new role. He describes the stupendous problems presented by the assembling, and stowing, of the thousands of tons of stores and equipment needed by the Expeditionary Forces and the way in which these problems were dealt with.

Rebuilding the Royal Navy May 12 2021 This design history of post-war British warship development, based on both declassified documentation and personal experience, is the fourth and final volume in the

author's masterly account of development of Royal Navy's ships from the 1850s to the Falklands War. In this volume the author covers the period in which he himself worked as a Naval Constructor, while this personal knowledge is augmented by George Moore's in-depth archival research on recently declassified material. The RN fleet in 1945 was old and worn out, while new threats and technologies, and post-war austerity called for new solutions. How designers responded to these unprecedented challenges is the central theme of this book. It covers the ambitious plans for the conversion or replacement of the bigger ships; looks at all the new construction, from aircraft carriers, through destroyers and frigates, to submarines (including nuclear and strategic), to minesweepers and small craft. The authors pay particular attention to the innovations introduced, and analyses the impact of the Falklands War. At the start of the twenty-first century the Royal Navy is still a powerful and potent force with new and a number of innovative classes, both surface and sub-surface, coming on stream. This book offers a fascinating insight into how the post-war fleet developed and adapted to the changing role of the Navy.
