The former Uncle Tupelo and current Son Volt musician presents snapshots of the people and places he encountered during his decades-long touring career. In this collection of beautifully crafted autobiographical vignettes, Jay Farrar visits the places he's journeyed to during his more than twenty years as a traveling musician. While recollections of Farrar's parents and his formative childhood in the Missouri Ozarks are prominent throughout the stories, it is music and musicians that are given the most space and the final word, since music has been his creative impetus and driving force. In writing these stories, Farrar found a natural inclination to focus on very specific experiences; a method analogous to the songwriting process. The highlights and pivotal experiences from that musical journey are all represented as the binding thread in these stories, illustrated throughout with photography from his life. If life is a movie, then these stories are the still frames. "Falling Cars and Junkyard Dogs extends Farrar's talents as he exhibits an eye for detail and a grasp of the human condition that proceeds directly from his own introspective nature." —All About Jazz "Provides some illumination of the creative mind of a very private artist." —Kirkus Reviews A complete reference book covering 1980 to 1989 truck and van models including all of the new mini-pickups and mini-vans. This book has a dual purpose: to identify problems faced by people who teach in correctional institutions and to propose solutions for those problems. The intent of this book is to help both new instructors as well as current ones perform their jobs effectively. The book is divided into three parts. The first part introduces the reader to the field of correctional education, describing correctional efforts in America, the kinds of facilities, the inmate populations, and the controversies, including advocates and critics, over providing educational opportunities. A description is provided on the kinds of educational and rehabilitation programs, including the varieties and sources of teachers and administrators. Part two explores the teaching process and how students are analyzed on their abilities, learning disorders, gender, ethnicity, gang membership, length of imprisonment, and reasons for enrolling in educational programs.

Each chapter is divided into two major sections: the first section studies the perspective and the second section concerns problems and solutions. Each problem is posed as a brief case study that includes the nature of a particular problem, factors affecting decisions about what a teacher might do, and one or more proposed solutions. Part three summarizes key concepts from the previous chapters and speculates about the state of correctional education in the years ahead. It will be of interest to those who contemplate a career in correctional education, those who are already in correctional education, or those who simply want to learn what teaching in a prison, jail, or juvenile facility is all about.
